# TROUBLE SHOOTING

## - Unable to connect to game console -

Most game consoles are shipped from the manufacturers with an Audio/Video RCA cable. The A/V RCA cable has three RCA plugs: a video plug (yellow) and two audio plugs (red and white). If your gaming console came with an A/V RCA cable, please follow the instructions supplied by the manufacturer for setting it up and connecting it to the TV. Please note that you must leave the red and white audio jacks on the A/V cable UNCONNECTED. Once the console is properly connected to your TV, please follow the diagram in the illustrated X Rocker Set-up guide to connect the gaming console to the X Rocker. If your gaming console was shipped with a coaxial cable, instead of an A/V RCA cable, you must follow an alternate set-up procedure (coaxial cable is the same type of cable that is used to connect a VCR to a TV). You will quickly recognize if your gaming console uses this type of cable. It connects the gaming console directly to the television and carries both the audio and video signal over a single cable. If your gaming console uses a coaxial cable, you CAN NOT connect it directly to the X Rocker. Instead, you must

Use an intermediary A/V device (such as a TV, VCR, DVD, TIVO, etc)

- a. Connect your gaming console to the intermediary A/V device via the coaxial cable.
- b. Connect the X Rocker to the 'Audio Out' jack on the intermediary A/V device.
- c. Follow diagram 2 in the X Rocker set-up guide to connect the X Rocker to the intermediary A/V device and finalize the setup.

If your gaming console is attached to an HD TV with an HDMI cable. You will need to connect the chair using either the audio out jacks on the back of the TV or by plugging into the headphone jack on the front of the TV.

## - Unable to hear any sound from the X Rocker -

1. Check to ensure that the power adapter is properly connected to the power jack (A8). When properly connected, the indicator light (A9) on the control panel should light up when the power switch (A7) is turned on. If the indicator light (A9) does not light up, try to use another power outlet in your home.
2. Make sure the power unit is turned on and indicator light on the control panel is lit. If it is not, please press the power switch on the control panel.
3. When you use wiremode, make sure the band(A6) is on "LINE IN" position.
4. When you use Bluetooth mode:
  - Make sure that there is no wired line that insert in your device before using bluetooth.
  - Make sure the band(A6) is on "BT" position,
  - Make sure the volume of X Rocker and the volume of mobile music device is set to a comfortable listening level.
  - Make sure you are within range of the X Rocker and your mobile music device is connected via Bluetooth technology with the X Rocker.
5. Once you have successfully completed 1 - 4 . please review the X Rocker illustrated set-up guide. Double check all audio connections. Finally, check that the volume on the hand remote is turned to an audible level on both the TV and the chair. If you have completed 1-5 and still do not hear sound, try connecting another audio source (CD player, television, VCR or game console) and go through the steps again. Still not working? Help is as easy as 1,2,3:
  - 1). Go to [www.thexrocker.com](http://www.thexrocker.com) for FAQ answers.
  - 2). Email [service@acebayou.com](mailto:service@acebayou.com)
  - 3). Call our customer service department at 866.969.2603 or 931.359.2603. Office hours are 8:30am to 5:00pm central standard time.

Bluetooth Device

## Pairing Your X Rocker:

Only 1 device can be paired to X Rocker at a time, to pair X Rocker with a mobile device, refer to the Bluetooth pairing procedures in corresponding mobile phone or music player user manual and follow the steps below:

- Make sure that there is no wired line that insert in your device before using bluetooth.
- Make sure the band(A6) is on "BT" position, and blue Bluetooth indicator light is slow flashing.
- Select the device name "X Rocker" on the screen of your device, add the unit to the your device's paired device list.
- When pairing is successful, the blue LED indicator(A13) will stay on.
- Confirm the connection on your device.
- Your X ROCKER is now connected and ready to play music! Just play music on your device as you normally would and the sound will come out of your X Rocker!

Keep in mind that X Rocker has a 30-feet / 10 meters range.

## Reconnecting Your Device

If you move out of range, or turn off the Bluetooth feature on your mobile device, X Rocker will disconnect from your device. To reconnect, simply access the Bluetooth Manager on your device and select "X Rocker" device listed.

## Changing Connected Device

If you want to switch from one device to another, follow the steps below:

- End the existing Bluetooth connection with the connected device, access the Bluetooth Manager and disable the Bluetooth function of the device.
- The X Rocker can now be connected to a different device.
- Follow the directions in "PAIRING YOUR X ROCKER" to connect a different device.

## Out of Range or Lost Signal

If the music device is out of range(beyond 30-feet / 10 meters) of the X Rocker, or there is something blocking the Bluetooth signal, the LED light will turn off to indicate that the Bluetooth connection with the music device has been lost.

To avoid a lost connection:

- Move the music device back into the range(within 30-feet / 10 meters), and/or make sure there is a clear line of sight and that there are no obstructions between the X Rocker and the music device.
- Within 30 seconds, the connection will automatically be re-established and the blue LED light will turn on. For your own device, you need to re-start your music player.
- If the connection is lost for more than 30 seconds, the connection will need to be re-established, follow the directions in "Reconnecting Your Device".

DIAGRAM 4 MULTI-USER CONNECTION

#### FUNCTIONS:

- Foldable construction for ease of storage and portability.
- Side control panel with volume, bass control, vibration control, input/output jacks, and band switch.
- Ergonomic design with full back support.
- Headphone jack for personal use.
- Easy to clean heavy duty upholstery grade vinyl cover.
- Play your iPhone, iPod touch, iPad or other device enabled with Bluetooth technology wirelessly through your X Rocker
- Control your music directly from your iPhone, iPod touch or iPad.
- Connect device without ever going near X Rocker

#### ATTENTIONS:

- USB port only can be used to charge electronic devices.
- Bluetooth connection has a 30ft. range of virtually unlimited wireless listening in your home.
- When using in wire mode, Please keep the band to "LINE IN" (A6)
- When using in Bluetooth mode, Please keep the band to "♫" (A6)

#### READ BEFORE USAGE:

- Always make sure hinge is locked before moving.
- Always make sure hinge is locked before sitting in the chair.
- Excessive use of audio equipment could lead to hearing loss.
- Excessive sound pressure from earphones and headphones can cause hearing loss.
- Children under the age of 13 should not use this product without adult supervision.
- Strictly for indoor use. Do not expose to direct sunlight, moisture or extreme temperatures.
- If the cover becomes wet, disconnect the power immediately and don't use until it is completely dry.
- Do not attempt to remove the cover or any components. Removal of the cover or tampering with components puts you at risk for injury or death from electrical shock.

#### SET UP:

1. Lift X Rocker out of box.
2. Keep the chair in the folded position and place it on the floor so that back side of the chair is touching the floor and the bottom of the seat is facing up.
3. Review the set up diagrams to familiarize yourself with the X Rocker's components, accessories, and set-up.
4. Please complete steps 1 - 4 to assemble the chair.
5. Unpack the power adapter and connect it to the main power outlet, then to the power jack on the control panel. (A8)
6. Press the power button (A7) and confirm that the power indicator light (A9) is on. In Bluetooth mode, Please keep the band to "♫" (A6), confirm that its indicator light is slow flashing (A13).
7. Follow the connection diagrams. They show how to connect the X Rocker to the audio source of your choice. Adjust the bass and volume levels to your preference----start rocking.

**More information please see additional assembly instruction!**
